

The MaitreView™ 4KPlus Enhances Conference Rooms

The Multi-window Video Processor Promotes Meeting Communications

- Uncompressed 4K/60Hz 4:4:4
- Real-time drag and drop to deploy layouts
- Adjustable borders on each region and layer
- Independent layouts processing on each output
- Seamless switching between multiple sources
- OSD - On-Screen Display to identify input sources on output screens
- Adjustable borderlines to highlight the selected regions
- Flexible control of the Web GUI, tablet APP, front buttons, RS-232, and APIs (Application Programming Interfaces)

Testimony

The MaitreView™ 4KPlus can transport uncompressed 4K/60Hz 4:4:4 and seamless-switching video to open numerous possibilities for versatile applications, from regular training to conference meetings.

— Burt Lee, Vice President for AV LINK

Applications

◆ Healthcare / Corporate

Make the Most of the Visual space to Enhance Collaborations
Multiple Display Speeds up the Decision-making Process

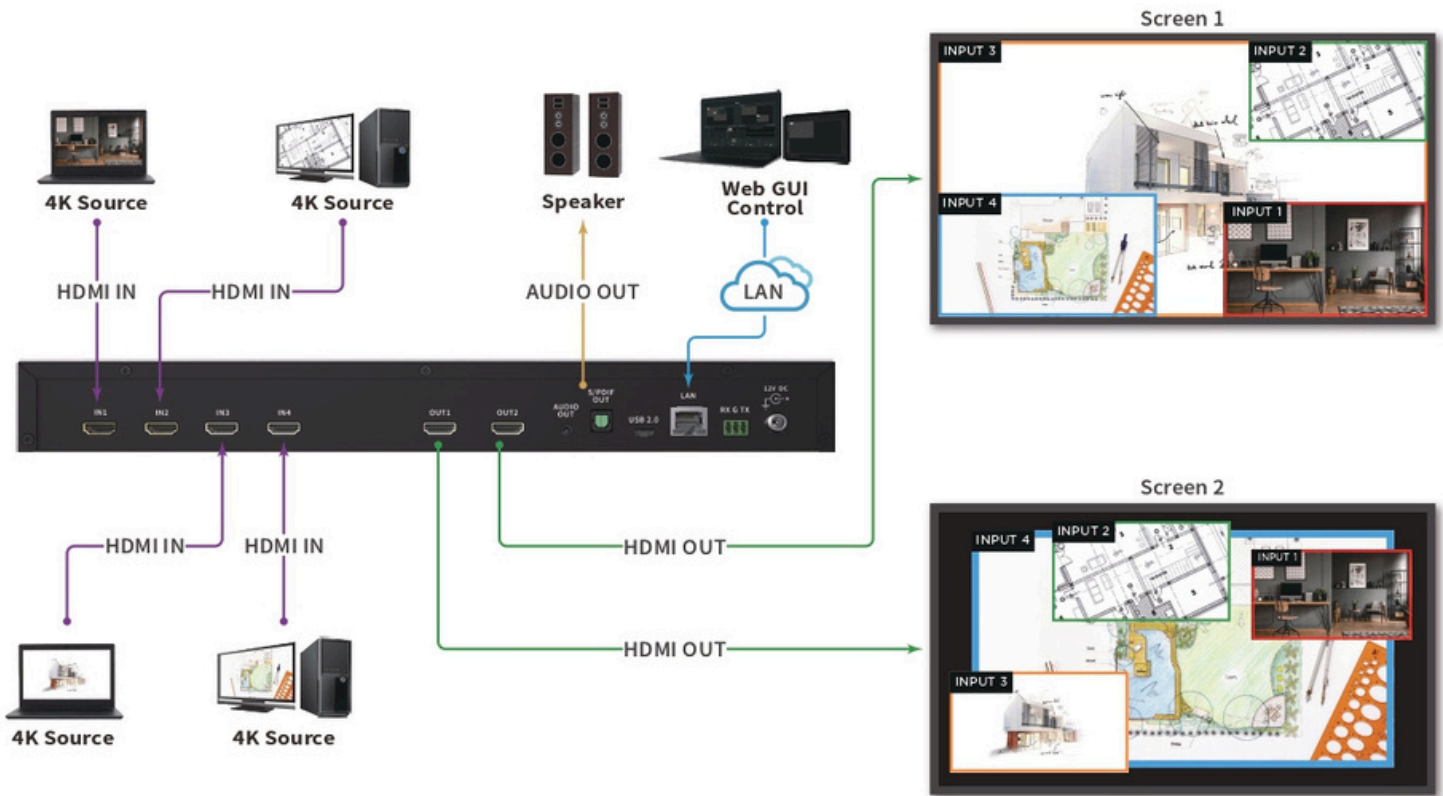

◆ Education / Fashion

Drag-and-drop features Achieve Intuitive Use
Show Information in Any Way and Anywhere Making Comparison Simple

◆ Government / Military

Made in Taiwan and Quality Guaranteed
Flexible Installation Satisfies Diversified Scenarios
